NOVEMBER IN SWEDEN JUNGS FRISKOLA

Erasmus+

THE PRESCHOOL CLASS - 6 YEARS OLD
HOW DO WE SEE THAT IT IS AUTUMN AT OUR
SCHOOL?

We found leaves on the ground.

Some leaves still on the trees.

They were yellow and brown.

It was a sunny day.

Class 1: 7 years old Nature in southern Sweden in November.

All the leaves
have fallen off
and the trees
are bare.

We went outside in pairs
and chosed one example of
nature in November. We
used our iPads.
It was a grey and cold day.

In class 2-3 we made our on PicCollage about nature in November.

Do you like our pictures?

VÅR NATUR

2-3

PIC•COLLAGE

Our preeschool class *Glädje* has done lots of works about Autumn. The children are 4-5 years old.

Glädjen means *The joy!*
We all love to be together in our school!

Pippi Longstocking came to speak about the importance of recycling things and to take care about our environment.

This is where we grow vegetables in the summer.

As every week we went to the woods. We collected leaves and sticks that we then created with.

We did a little bike ride to watch some rabbits.
